

Single Address Lookup   Bulk Address Lookup   Help

This tool allows you to convert an address to a Network Site Code (NSC). Type a street address (example: "1602 pennsylvania ave ne, washington dc 20004") into the text field(s) below. [Click and drag](#) over text to search for the corresponding NSC. Address lookup results are displayed at the bottom below.

Result accuracy is indicated by a label to the right of the address:

- Address with an exact NSC match
- Address without an exact NSC match
